

9th EduMeet 2025 & Excellence Awards

Organized by: ASSOCHAM
Eastern Region

Date: 18th July 2025

Venue: Kolkata

Nomination Closing Date: 25th June 2025

The Event

The world's education system is immense, with numerous countries having their own unique approaches to education. India boasts one of the largest higher education systems globally, with over 62,000 institutions. The Indian education sector is projected to reach \$313 billion by FY30. In recent years, the Government of India has introduced transformative reforms aimed at improving the quality, accessibility, and skill-orientation of education.

In recent times, education space has witnessed a rapid shift towards high-tech approaches. AI has transformed various sectors globally, and education is no exception. AI has proven to be of use in enhancing teachers' efficiency and effectiveness in managing Multi Levelled Units and use tools to tailor the learning materials to a child's level of competence, improving engagement and much more.

Government initiatives, like the allocation of ₹500 crore for a Centre of Excellence in AI for Education, demonstrate a commitment to AI integration across all levels of education, from school to higher education.

By 2030, India will have the largest number of young populations in the globe, a population size which will be a boon only if these young people are skilled enough to join the workforce. Quality education will play a major role in it.

The trends to watch in higher education student engagement, include the rise of AI in personalized learning, and a growing focus on accessibility, DEI, and mental health support. There's a trend towards hybrid learning models, competency-based education, and a greater emphasis on global collaborations and lifelong learning.

To further build upon technology with human touch and to discuss the implementation of NEP so that it benefits reach out ot all concerned, ASSOCHAM is organizing **9th edition of Education Meet on 18th July 2025, Kolkata**, will have parallel sessions, engaging discussions with subject experts and industry leaders focusing on Higher Education, School Education and Skill Development.
