

## CONFERENCE ON ENERGY EFFICIENT BUILDINGS AND REGULATORY FRAMEWORK

**Theme: Towards Sustainable Infrastructure in Andhra Pradesh**

**14 October 2025**

**Novotel Vijayawada Varun, Andhra Pradesh**

Over the past decade, Andhra Pradesh has made significant progress in promoting energy efficiency and sustainable practices within the built environment. The state has institutionalized the Energy Conservation Building Code (ECBC) and integrated it into the online building permission system, ensuring its implementation across commercial buildings with the handholding support of the Administrative Staff College of India (ASCI) and the ECBC technical committee.

In 2024, the Bureau of Energy Efficiency (BEE), Ministry of Power, Government of India, introduced the Energy Conservation and Sustainable Building Code (ECSBC) applicable for both commercial and residential building sectors. Building on its experience with ECBC, Andhra Pradesh should now aim to adopt this revised code, extending its application to both commercial and residential buildings to further enhance sustainable urban development.

As the Capital Region Development Authority (CRDA) undertakes major infrastructure projects in Amaravati and other urban centres, this conference jointly organized by ASSOCHAM and ASCI seeks to incorporate energy efficiency and sustainable building practices into all aspects of urban planning, policy development, and project execution.

### Conference Objectives:

- Showcase Andhra Pradesh's journey in ECBC implementation and energy efficiency promotion in the building sector.
- Engage technical and policy stakeholders in deepening code integration across ULBs and CRDA.
- Catalyse dialogue on sustainable urban planning aligned with national climate goals.

### Key Sessions:

- Significance of Energy Efficiency Codes: Grievances & Compliance
- Stakeholder Roles in Enforcing Building Energy Codes
- Integrating ECBC & Sustainability Norms in CRDA and Smart City Projects

### Expected Outcomes:

- Unified roadmap for ECBC and new version compliance across both residential and commercial building sectors
- Renewed commitment to green building practices
- Technical insights for policy and regulatory frameworks

### Who Should Attend?

- Senior officials from CRDA, MA&UD, Energy, R&B, Urban Planning
- Builders & Developers, Municipal Commissioners, Smart City leaders
- Experts from ASCI, ASSOCHAM, IGBC, GRIHA, EDGE, BEE
- Academicians & Professionals in Architecture, Engineering, and Construction
