Exchange rate (USD/MXN) used by the Ministry of Finance for the economic plan 2025 \$ 18.5

DESCRIPTION

The project consists of the construction of civil and electromechanical works for the power supply to the Administration of the National Port System of Veracruz:
 - Veracruz II Electrical Substation (E.S.) : Expansion of the substation to include two 230 KV feeders for the transmission lines connecting this facility to the Asipona Load Center substation; construction of civil and electromechanical works for the two 230 KV feeders and one control booth.
 - Asipona Load Center Electrical Substation (E.S.) : Installation of two three-phase transformer banks of 30 MVA each, with voltages of 230/13.8 kV; two 230 KV feeders for the transmission lines linking this facility with the Veracruz II C1 and Veracruz II C2 substations; and 16 feeders at the 13.8 kV voltage level.
 The project includes supply, testing, and commissioning.

Contract Scope: Design, Construction, Extension, Equipment

Type of Project: Public

Selection Process:

International Open Tender

Term:

Type of Contract: Public Works

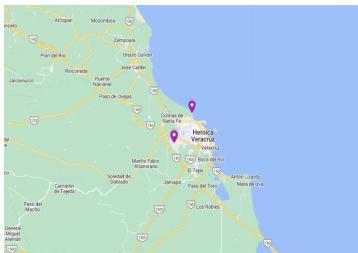

Payment Source:

Budgetary

Asset (s):

Power Station /Electrical Substation 230 KV, Transformer Bank 30 MVA
