# Cyber Insurance

*"Reinvigorating the Future for Bridging the Gap"*

Thursday, 23<sup>rd</sup> September 2021 (11:00 AM- 02:00 PM)

### OVERVIEW

Cyber Insurance is designed to help businesses hedge against potential cybercrime including Ransomware, Malware and Denial-of-Service (DDoS) attacks. It is a specialty lines insurance product intended to protect businesses, and individuals providing services for such businesses, from Internet-based risks, and more generally from risks relating to information technology infrastructure, information privacy, information governance liability, and activities related thereto. Risks of this nature are typically excluded from traditional commercial general liability policies or at least are not specifically defined in traditional insurance products.

However, Cyber risk is steadily increasing. Security/Data breaches affect millions of records a year and reports of breaches continue to rise at a dramatic rate. The introduction of viruses and unauthorized access are well known examples. Also, the typical Commercial General Liability (CGL) policy provides protection against claims of bodily injury or property damage for which your business may be liable. The Commercial General Liability insurance covers a wide range of Liability loss exposures faced by most organisations; it is the foundation for most organisations' Liability insurance programs.

Keeping these imperatives in mind, the ASSOCHAM National Council for Insurance is organizing National E-Summit On Cyber Insurance "Reinvigorating The Future For Bridging The Gap" will focus on bridging the identified industry gaps through innovation. The outcome of this effort will be an increase in TRUST, AFFORDABILITY & ACCESSIBILITY. The e-summit will also showcase a curated set of start-ups that are working to address these gaps with solutions that could potentially be game changers.

### KEY AREAS OF DISCUSSION

- Cyber Security & Commercial General Liability (CGL) Insurance.
- New Growth Opportunities & New Risks for the Cyber Insurance Industry.
